OBJECTIVE

Motivated M.Tech Integrated Software Engineering student at VIT Vellore with experience in full-stack development, machine learning, and software engineering. Passionate about Python development, Artificial Intelligence, Natural Language Processing (NLP), and Generative AI. Seeking internship and project opportunities to apply technical skills, solve real-world problems, and contribute to impactful software products.

EDUCATION

M.Tech Integrated Software Engineering VIT Vellore | 2024 – 2029 | CGPA: **8.65/10**

TECHNICAL SKILLS

Programming Languages

- Python
- Java
- JavaScript
- SQL

Frontend Development

- React
- Vite
- HTML5
- CSS3

Backend Development

- Node.js
- REST APIs

Databases

- MongoDB
- MongoDB Atlas

AI/ML & Data Science

- Machine Learning Fundamentals
- Natural Language Processing (NLP)
- Generative AI
- NumPy
- Pandas

Tools & Technologies

- Git
- GitHub
- Cisco Packet Tracer
- StarUML
- ReportLab

Other Skills

- JWT Authentication
- UML Modeling
- Agile Workflow
- API Integration

PROJECTS

VITmate — Hostel Roommate Finder

Full-Stack Web Application | JavaScript, HTML5, CSS3, REST APIs | 2025

- Designed and developed a full-stack web application to help students find compatible hostel roommates.
- Implemented user authentication, dynamic group management, and real-time data rendering features.
- Applied software engineering best practices including modular architecture, Git version control, and agile development methodologies.
- Built a scalable platform aimed at improving student coordination and accommodation management.

Project Link:

Gamified Developer Portfolio**Web Application | Python, JavaScript, API Integration | 2025**

- Developed an interactive portfolio website with gamification features and dynamic content.
- Integrated third-party REST APIs to fetch, process, and display live data.
- Implemented responsive UI design and optimized user experience.
- Demonstrated front-end development, API integration, and clean coding practices.

Project Link:

Fake News Detector (Currently Developing)**Machine Learning & NLP Project | Python, Pandas, Scikit-learn | 2026 – Present**

- Developing a machine learning-based system to classify news articles as real or fake using Natural Language Processing techniques.
 - Performing data cleaning, preprocessing, and feature extraction on large-scale news datasets.
 - Applying TF-IDF vectorization and machine learning algorithms such as Logistic Regression and Naive Bayes.
 - Evaluating model performance using accuracy, precision, recall, and F1-score metrics.
 - Exploring deployment options for a user-friendly web application.
-

HACKATHONS & EXTRACURRICULAR ACTIVITIES

- Participated in multiple college-level hackathons, collaborating with teams to design and develop innovative software solutions under strict time constraints.
 - Applied problem-solving, teamwork, and rapid prototyping skills to build functional project prototypes.
 - Gained hands-on experience in project ideation, software development, and technical presentations.
 - Engaged with peers and mentors to explore emerging technologies in software engineering, AI, and web development.
-

CERTIFICATIONS

- Python Programming — TuteDude
 - Machine Learning Fundamentals — TuteDude
 - Natural Language Processing (NLP) Fundamentals — TuteDude
 - Generative AI Fundamentals — TuteDude
-

PROFESSIONAL PROFILES

GitHub: github.com/KPCHIRAGGUPTHA

LinkedIn: [linkedin.com/in/k-p-chirag-guptha](https://www.linkedin.com/in/k-p-chirag-guptha)

AREAS OF INTEREST

- Artificial Intelligence
 - Machine Learning
 - Natural Language Processing
 - Generative AI
 - Full-Stack Development
 - Software Engineering
 - Data Science
-

STRENGTHS

- Strong Problem-Solving Ability
- Quick Learner and Self-Motivated
- Team Collaboration and Communication
- Analytical Thinking
- Adaptability to New Technologies
- Project Ownership and Leadership
